

満天星つつじ

Enkianthus perulatus

DODAN TSUTSUJI

White enkianthus

TECHNICAL SHEET

Characteristics

Acid-loving, deciduous shrub, blooming profusely with small, white flowers at the beginning of April which are followed by a new brilliant, light green vegetation turning bright red in autumn.

Care

Loves well-drained, acid soils; keep in semi-shade, treat with an insecticide in spring.

Pruning

After flowering up until October.

 partial shade

 abundant watering

pH acid pH soil

 hardy -15°C

Curiosity

Unlike the more commonly spread species "campanulatus", it stands out for the splendid, more brilliant, orange-red vegetation it produces in autumn.
