

犬槇

Podocarpus macrophyllus

INU MAKI

Buddhist pine

TECHNICAL SHEET

Characteristics

Big-sized evergreen, with slim, light green leaves; at summer end can bear greenish blue and red berries hanging in pairs. Mighty, dark brown trunk.

Care

Can be grown in mild climate areas, where temperatures never drop below -15°C; suitable for any soil type, as long as well-drained. Fertilize moderately with slow release fertilizers. Two preventive insecticide treatments with white oil are recommended in winter as well as two large spectrum insecticide treatments in summer.

Pruning

From summer until October, using sharpened hedge clippers.

 sunny

 regular watering
